Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards et al. '294 further in view of Moorman et al. (US 2002/0058932). Edwards et al. disclose a microwave device for applications of acute hyperthermia comprising a microwave antenna which inherently includes an inner conductor, a dielectric layer and an external conductor; a tubular application device (figures 5-11), a side opening, a chute guide as illustrated by the figures, a plastic catheter as the application device and a flexible mandrel (58).

Edwards et al. teach all of the limitations of the claims except the application device being a hollow needle. Moorman et al. disclose a similar microwave device and teach that it is old and well known in the art to provide a hollow needle as the application device so that ablation can be facilitated without the need to withdraw the device from the puncture site. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a hollow needle as the application device with the Edwards et al. apparatus so that ablation can be performed without having to withdraw the device.

Response to Arguments

Applicant's arguments filed 8/10/06 have been fully considered but they are not persuasive. Applicant argues that Edwards and Moorman et al. do not result in a minimally invasive surgery. Applicant has failed to provide any structural limitations of the claims that have not been met by the combination of Edwards and Moorman et al. Therefore, the claim limitations have not been differentiated from the teaching of the prior art recited in the rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
